Smart Security for Waste Management

Waste Management, Inc. (WM), the leading provider of comprehensive waste and environmental services in North America, is committed to making a difference for our environment. WM wanted a cost-effective security system to provide smart video for their 2,200 locations in the field. The solution? Honeywell's Active Alert® intelligent video analytics. This software tool lets them manage a large number of cameras with a small number of staff and notify operators in real-time of alarm events.

Before Active Alert, WM's assets, cash-based weigh-in business, and employees were vulnerable. With Active Alert, WM created restricted zones and monitored the weigh-in stations effectively. By thinking smart about security, WM has more time to focus on their "Think Green" mission of beautifying our world.
